Flux-Pens „BONPEN“

BON102

BR102

BR102, Spare Tips, cone shape short, L 14mm, W 4,3mm, fine nylon-brush

BON102S

BR102S

BR102S, Spare Tips, cone shape short, ultrafine, L 10mm, W 2,5mm, very fine nylon-brush

NEW !

BON102T

BR102T

BR102T, Spare Tips, cone shape long, L 18 mm, W 5,2mm, fine nylon-brush

BON102D

BR102D

BR102D, Spare Tips, flat-chisel shape, L 17 mm, W 6,2 mm, fine nylon-brush

BON102B

BR102B

BR102B, Spare Tips, cone shape short, L 9,5 mm, W 4,5 mm, Fine felt

BON102F

BR102F

BR102F, Spare Tips, flat-chisel shape, L 10 mm, W 4,5 mm, Fine felt

BON102K

BR102K

BR102K, Spare Tips, angled flat-chisel shape, L 12,5 mm, W 4,5 mm, Fine felt

CA102

Behälter/Griff, 7cm

BON102 = BR102 + CA102

Over all Length: **BON102** approx. 170 mm
the Printed Version scale is a bit smaller than 1:1

www.bonkote.eu**BONPEN, Japanese Precision, an Art on its own!**

These handy Bon Pens allow for very accurate flux dispensing on the work area, while eliminating dripping and flooding, making it irreplaceable for every SMD-workplace

BONPEN-Materials: PP, PE, Nylon.

BONPEN is **Suitable for:** Fluxes, Alcohol, Fluoric Lube, Primers, Flux inhibitors, Water

Available again: BON-102A set,
The Set contains 1 pc of all 6 different BON-102
(except BON-102S)

The LICO-Superscope, only available as well checked & refurbished pre-owned.

This is one of the smartest purchase you can make, * supply as long as stock lasts.

Microscope with 14" Display

Using this unique solution the operator can stop leaning over objects. Neck and backpain is a thing of the past!

The Super Scope offers a distortion-free Zoom-range of 4X - 40X (with optional Aux-lens can be reached 8X - 80X, as far as lens is available. A big working distance lens to object allows a convenient working depth on the objekt.

Including a LED light source with dimmer. The brightness can be regulated step-free. Optionally other light sources are available.

A large 14" high-resolution display from SONY Medical allows a very convenient inspection and work under the microscope.

A PAL-Video-output for Framegrabbers available on the PC-market rounds up the universal use of the versatile Microscope. Sliding arm and heavy stand-base is included.

Flux-Pens

The Packaging:

BON-102A - Set of 6 pcs

BON-102AS - Set of 7 pcs

Flux-Pens

The Original-Bonkote Packaging

BONPEN & Spare-tips: Packages of 5 pcs each

Use only Original-Bonkote-parts
to ensure the function and exclude
handling and operation faults!
Please mind the user-manual!

The Bonkote Fine Cleaner

Are you using wet sponges or metal sponges to clean your soldering tips?

It is proven that such temperature shocks slowly but surely crack the coating surface of soldering tips. The temperature drop can be even 50 - 100°C And such circumstance can lead into instable soldering temperature. And finally such temperature shocks reduces the life expectancy of soldering tips remarkably.

Metal sponges scratch the fine surface of soldering tips which also reduces the life expectancy.

Bonkote round stainless steel bars and the smooth high temperature rubber **can save considerably** on your soldering tip life by avoiding scratches and high temperature drops.

The Fine-Cleaner consists out of a High temperature rubber part and a Magnet

This Magnet can be fixed at the bottom of the Cleaner

Strong residues can be pre-cleaned or cleaned at the rounded stainlessbars.

Simple residues can be cleaned off the tip at the rubber lip

Types:

Model	Inner Diameter	Outer Diameter	Weight
B-250	25 mm	50x22 mm	65 g
B-500	50 mm	87x30 mm	185 g

Materialies: Magnetic plate, High temperature-rubber, rounded stainless steel bars
